Re: Approval of Proposal
Sanitary Landfill Operation
Approximately Fifty Acres on
New Paris Pike, Three Miles East of
Richmond, Wayne County

You are hereby notified that the Stream Pollution Control Board of the State of Indiana has this 20th day of August, 1974, approved the proposal for the operation of a sanitary landfill at the above-referenced location.

The operation will consist of an area method over the portion of the site previously filled. The hills surrounding the proposed sanitary landfill will be used as the cover material source for 6-inch minimum daily and 2-foot minimum final cover. A dam is proposed above the presently filled area and a diversion ditch is proposed around the fill to keep surface water from encroaching the operation. A leachate collection system is proposed consisting of a perforated pipe draining into a leachate collection pond which will be periodically treated with lime to precipitate the leachate which will then be dried and landfilled.

This approval is given with the following conditions:

1. That all garbage and refuse be disposed of in a manner to prevent contamination of ground water and pollution of surface waters.
2. That no burning of wastes be conducted at the sanitary landfill site.
3. That, if nuisance or pollution conditions are created, immediate corrective action will be taken by the operator.

Mr. David E. Benner

August 20, 1974

4. That all necessary local permits, including zoning, be obtained prior to any operation.
5. That the operation of the sanitary landfill be conducted in accordance with the "Minimum Requirements for Selection, Operation and Maintenance of a Sanitary Landfill," adopted by the Division of Sanitary Engineering, Indiana State Board of Health. (A copy is enclosed)
6. That no liquid or hazardous chemical wastes be deposited at this landfill.
7. That no scavenging or salvaging be permitted at this site.
8. That this approval be renewed upon any change in ownership or operating contractor.

This proposal was prepared and certified by David E. Benner, P.E., and submitted on August 1, 1974.

This approval shall be void if operation is not begun before September 1, 1975.

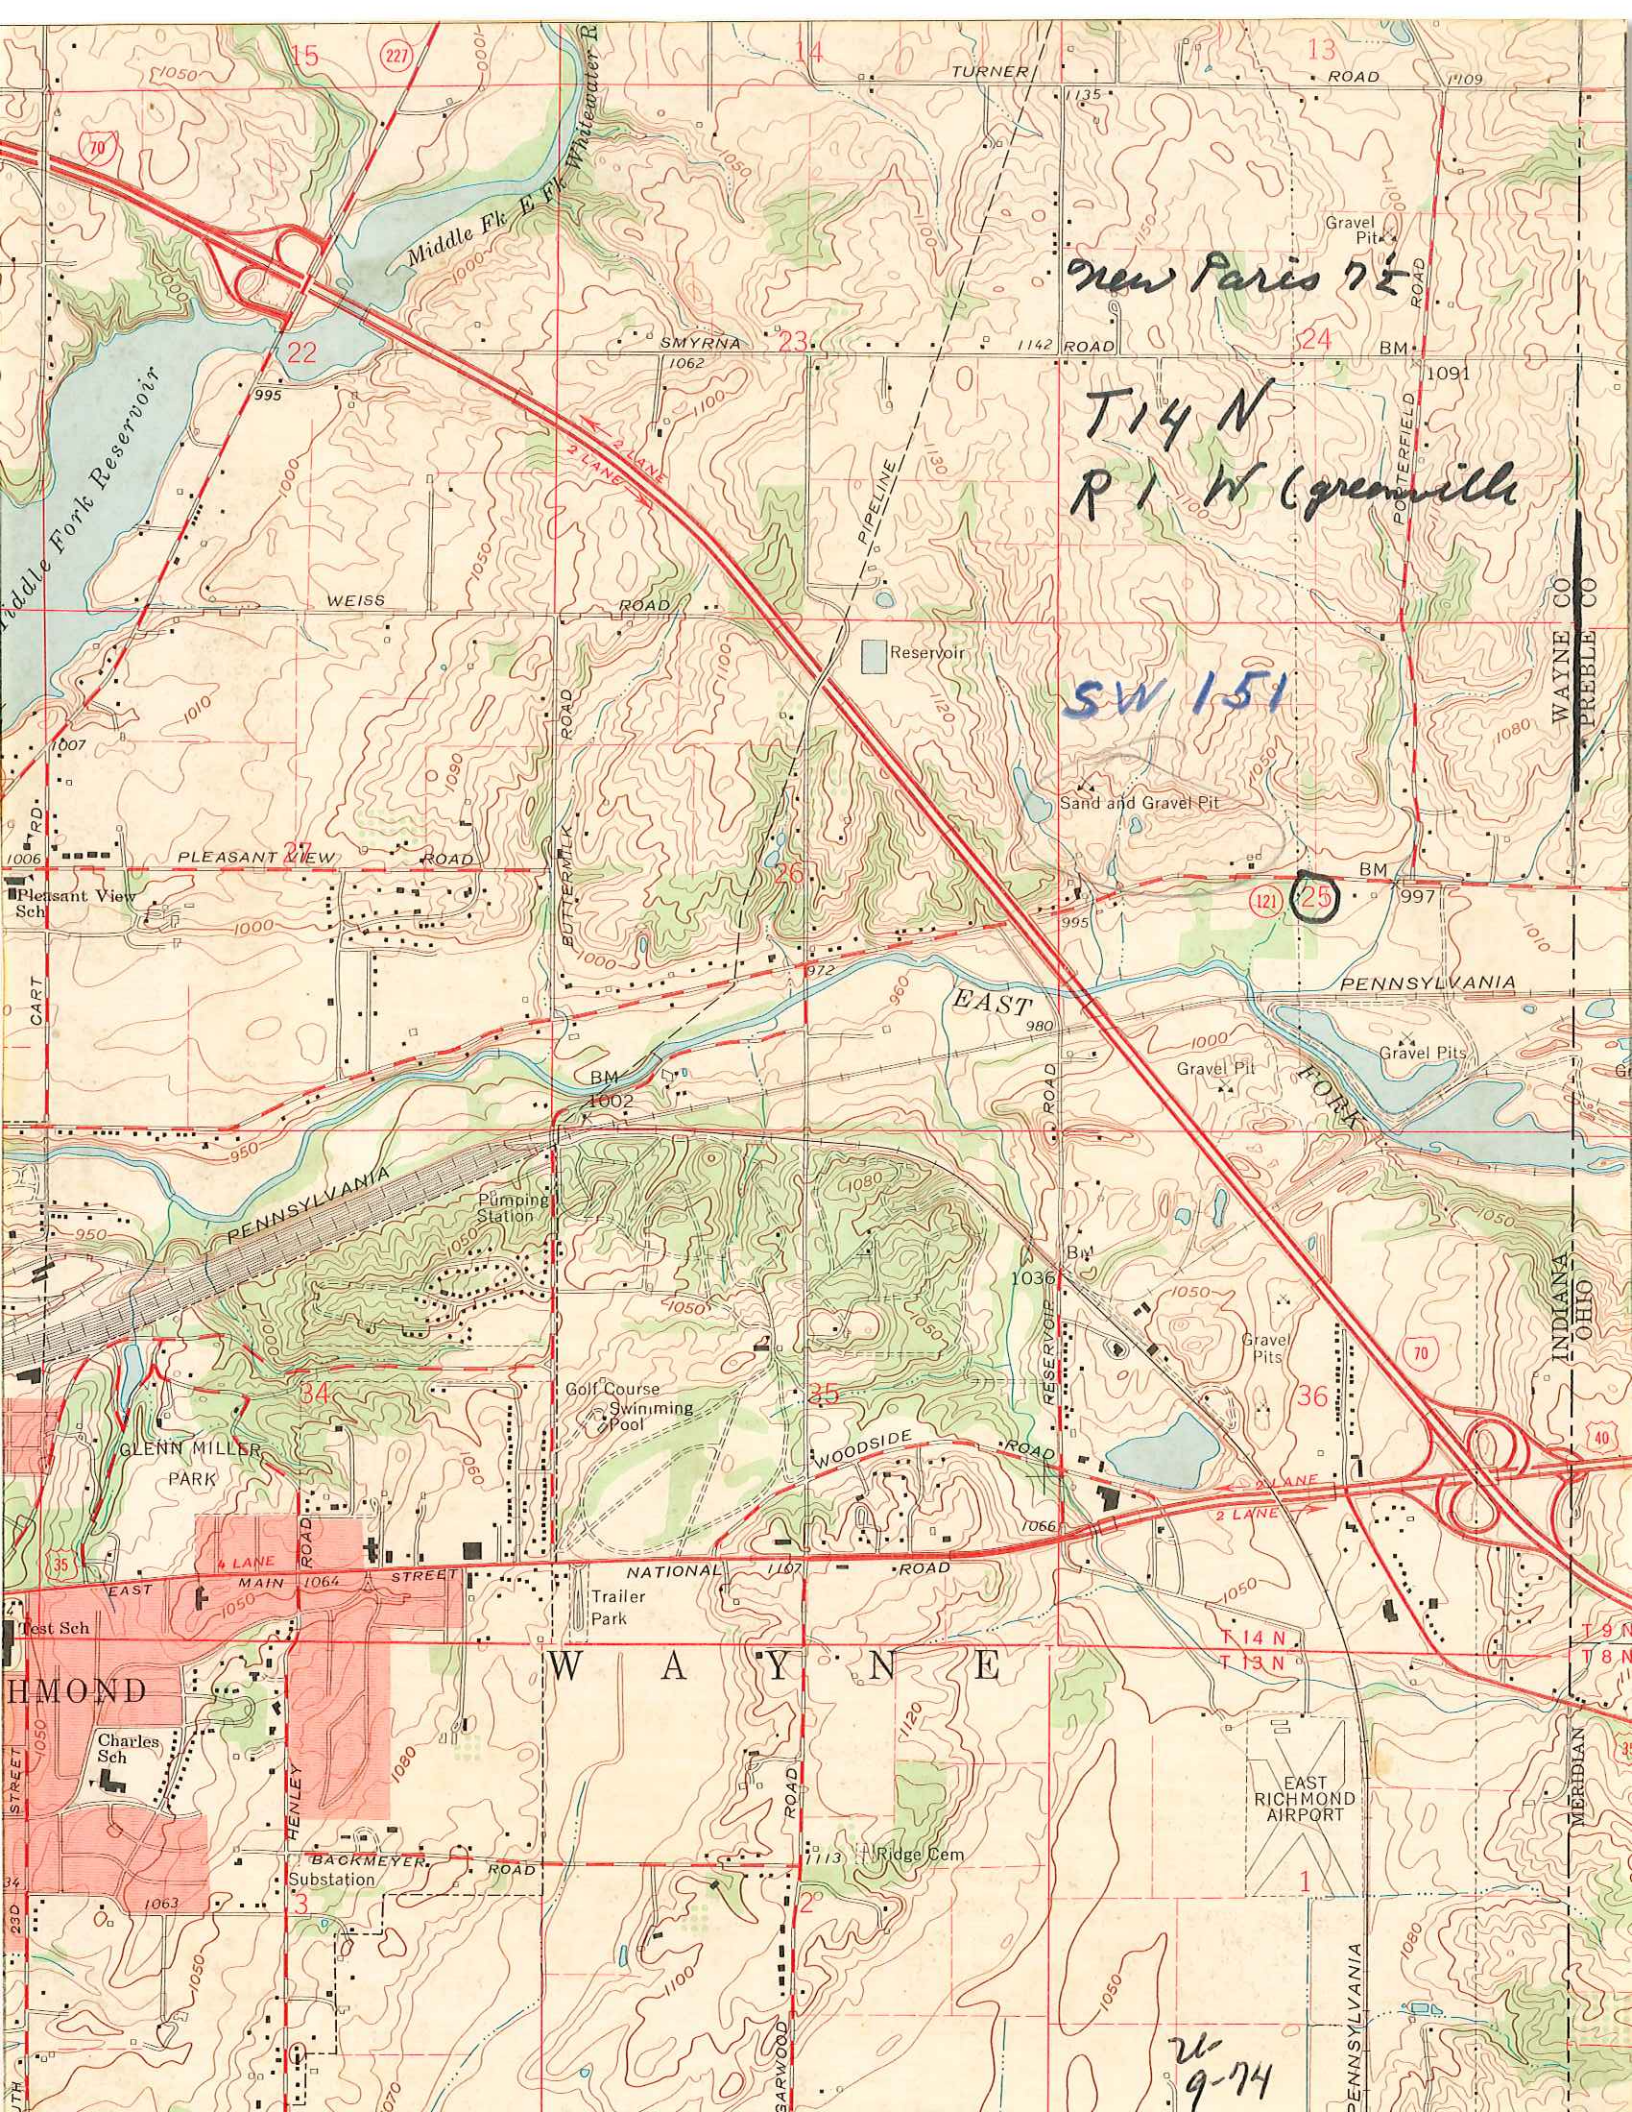

Very truly yours,

Oral H. Hert
